

# Chromatography of Chlorophyll

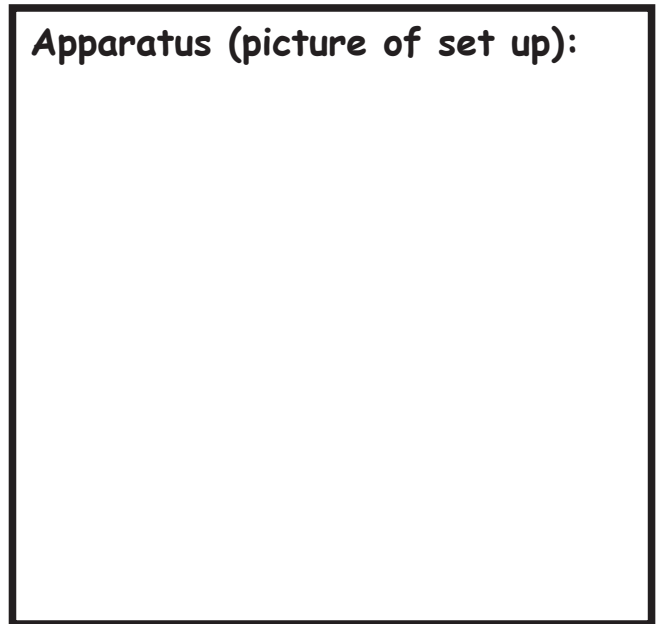

Experiment Aim (what you investigated):

Hypothesis (if...then, because...):

Materials (what you used):

- 
- 
- 
- 
- 
- 
- 
- 
- 

Apparatus (picture of set up):

Method (experiment steps - as a numbered list of short complete sentences):

Data and Observations (table or results):

Data analysis (1 paragraph discussing your results):

Conclusion (did your results support the hypothesis - explain the results, what went well and what would you change?):
